Re: Proposed/Draft Local Coverage Determination (LCD): Urological Supplies (DL33803)

To Whom It May Concern:

The American Association for Homecare (AAHomecare) is pleased to have the opportunity to submit comments on the Durable Medical Equipment Medicare Administrator Contractors' (DME MACs') draft of Local Coverage Determination (LCD) for Urological Supplies (DL33803).

AAHomecare members include a cross section of suppliers, manufacturers, and other industry stakeholders that assist, make or furnish DMEPOS items that beneficiaries use in their homes. Our members are proud to be part of the continuum of care that assures Medicare beneficiaries receive cost effective, safe and reliable home care products and services.

AAHomecare requests additional clarifying language in the Urological Supplies Policy Article (PA). The Surgical Dressing PA has the following sentence: *"A new order is needed if a new dressing is added or if the quantity of an existing dressing to be used is increased."*¹ AAHomecare requests the DME MACs include a similar sentence in the Urological Supplies PA.

We appreciate the opportunity to submit these comments. Please feel free to reach out to me if you need additional information.

Sincerely,

Kimberley S. Brummett, MBA
Vice President for Regulatory Affairs

¹ Local Coverage Determination (LCD): Surgical Dressings (L33831)
